ABLe CHANGE PROCESS
For Systems Change

1. Define a targeted problem
2. Develop a process to engage diverse perspectives
3. Scan system conditions influencing the targeted problem
4. Engage stakeholders in making sense of system data
5. Design powerful strategies
6. Develop a shared agenda
7. Effectively implement and track actions
8. Promote small wins
9. Use an action learning process to learn for continuous improvement
10. Develop a systemic action learning infrastructure
